

PHENOXYPEN[®]

The targeted solution
for a smarter
Streptococcus suis strategy

Dopharma is
presenting
in premiere
Phenoxypen[®]
as proud ESPHM
Gold Sponsor

Dopharma is proud Gold Sponsor of the 17th European Symposium of Porcine Health Management. This leading event, where veterinarians, researchers and industry innovators from around the world come together and share knowledge, is for us the perfect time and place to introduce the newest addition to our portfolio: **Phenoxypen[®]** for pigs.

The extension of **Phenoxypen[®]** with a new animal species and indication, Dopharma brings, in line with the spirit of the symposium, an innovative solution for one of the biggest challenges in pig farming worldwide: *Streptococcus suis* infections in pigs.

Phenoxypen[®] contains the narrow spectrum phenoxymethylpenicillin (or 'penicillin V') for treatment and metphylaxis of *Streptococcus suis* infections. As penicillins are the drugs of choice for this important disease, veterinarians have now a new therapeutic solution which is effective and targeted at the gram-positive pathogen. **Phenoxypen[®]** is highly soluble in water and acid stable. This makes the product very suitable for oral treatment via drinking water.

The availability of this narrow spectrum penicillin for use in drinking water is an important contribution to the **One Health** concept in the swine sector. Thanks to the targeted gram-positive spectrum of the product, streptococcal infections can now be treated effectively and with less selection pressure on gram-negative bacteria. This results in the additional benefits of **less resistance development of the microbiome** and **better intestinal health maintenance** during treatment.

Explore how we can help you move forward

After years of research, we have gained a great deal of knowledge and expertise. With the eventful launch of **Phenoxypen[®]**, we are happy to share this information. To stay up to date, scan the QR-code below. Here you can follow further developments.

On our website dopharma.com there is more to discover about our full range of products and Dophavacc Diagnostics. Take the opportunity and find out how we can help you work smarter, achieve better results, and unlock new opportunities!
